# TESC20R0V14B1X

## **ESD SUPPRESSOR**

#### **Features**

- SMD type zinc oxide based ceramic chip
- Lead free plating termination provided good solderability characteristic
- Insulator over coat keeps excellent low and stable leakage current
- Quick response time (<1ns)
- Low clamping voltage
- High transient current capability
- Meet IEC 61000-4-2 standard
- Compact size for EIA 0603

## **Applications**

- Application for Mother Board, Notebook, Cellular Phone, PDA, handheld devic DSC,DV,Scanner, and Set-Top Box etc.
- DSC,DV,Scanner, and Set-Top Box etc.
- Data port:Audio,Video,Keyboard,Charge etc.

### **Construction & Dimension**

| Unit: mm | 0603      |
|----------|-----------|
| L        | 1.60±0.15 |
| W        | 0.80±0.1  |
| Т        | 0.80±0.1  |
| С        | 0.30±0.20 |

### Part ratings and characteristics

|                | Working voltage  |                 | Varistor voltage | Clamping<br>Voltage | Capacitance | Peak current | Transient energy |
|----------------|------------------|-----------------|------------------|---------------------|-------------|--------------|------------------|
| Symbol         | V <sub>RMS</sub> | V <sub>DC</sub> | Vv               | Vc                  | Ср          | İmax         | W <sub>max</sub> |
| Units          | Volts            | Volts           | Volts            | Volts               | pF          | Amps         | Joules           |

| TESC20R0V14B1X | -                | 14              | 45 ~ 65          | 135                 | 20          | -            | -                |

- $V_{\text{RMS}}$  Maximum AC operating voltage the varistor can maintain and not exceed10 $\mu$ A leakage current
- V<sub>DC</sub> Maximum DC operating voltage the varistor can maintain and not exceed 10μA leakage current
- V<sub>V</sub> Voltage across the device measured at 1mA DC current. EquiValent to Vb, "Breakdown Voltage".
- Cp Device capacitance measured with zero volt bias 1 ms at 1MHz.
- Vc Maximum peak voltage across the varistor measured at 8/20us waveform and 1A pulse current
- i<sub>max</sub> Maximum peak current which may be applied with 8/20us waveform without device failure
- $W_{\text{max}}$  Maximum energy that may be dissipated with the 10/1000us waveform without device failure.

# **General electrical specifications**

#### General technical data

| Operating temperature          | -40 +85°C             |
|--------------------------------|-----------------------|
| Storage temperature (on board) | -40 +85°C             |
| Response time                  | <1 ns                 |
| Solderability                  | 245±5°C, 5+0/ -0.5sec |
| Solder leach resistance        | 260±5°C,10 ±1sec      |

### **Environmental Specifications**

| Characteristics | Specifications                | Test condition                          |
|-----------------|-------------------------------|---|
| Bias humidity   | $\Delta V_V/V_V \le \pm 10\%$ | 90%RH, 40℃, Working voltage, 1000 hours |
| Thermal shock   | $\Delta V_V/V_V \le \pm 10\%$ | -40°C to 85°C, 30 min. Cycle, 5 cycles  |
| Full load       | AV /V < ±100/                 | Working voltage 95°C 1000 hours         |
| voltage         | $\Delta V_V/V_V \le \pm 10\%$ | Working voltage, 85°C, 1000 hours       |

# Storage Condition with package

Storage Temperature: 5 to 40°C

Relative Humidity: to 65% Storage Time: 12 months max

# **Taping Package and Label Marking**

### **Carrier tape dimensions**

|       |       |       |       |       |             | , ·   |

## Taping reel dimensions

| Α | 178.0±2.0 |
|---|-----------|
| В | 2.0±0.5   |
| С | 13.0±0.5  |
| D | 21.0±0.8  |
| E | 62.0±1.5  |
| F | 9.0±0.5   |
| G | 13.0±1.0  |

# **Taping specifications**

There shall be the portion having no product in both the head and the end of taping, and there shall be the cover tape in the head of taping.

## Quantity of products in the taping package

- (1) Standard quantity: 4000pcs/Reel for MLVS 0603 Lead Free series
- (2) Shipping quantity is a multiple of standard quantity.

### **Precautions for Handling**

### Solder cream in reflow soldering

Refer to the recommendable land pattern as printing mask pattern for solder cream.

- (1) Print solder in a thickness of 150 to 200 μm.
- (2) Dimensions: millimeters (inches)

#### Precaution for handling of substrate

Do not exceed to bend the board after soldering this product extremely. (Reference examples)

- Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
- Do not bend extremely the board, in mounting another component.

  If necessary, use back-up pin (support pin) to prevent from bending extremely.
- Do not break the board by hand. We recommend using the machine or the jig to break it.

#### Precaution for soldering

Note that rapid heating, rapid cooling or local heating will easily damage this product.

Do not give heat shock over 100°C in the process of soldering. We recommend taking preheating and gradual cooling.

#### Recommendable reflow soldering

### \*According to J-STD-020C

| Profile Feature                             | Pb-Free Assembly |
|---|------------------|
| Average Ramp-Up Rate                        | 3° C/second max. |
| (Tsmax to Tp)                               |                  |
| Preheat                                     |                  |
| <ul><li>– Temperature Min (Tsmin)</li></ul> | 150°C            |
| <ul><li>– Temperature Max (Tsmax)</li></ul> | 200°C            |
| <ul><li>– Time (tsmin to tsmax)</li></ul>   | 60-180 seconds   |
| Time maintained above:                      |                  |
| <ul><li>– Temperature (TL)</li></ul>        | 217°C            |
| – Time (tL)                                 | 60-150 seconds   |
| Peak/Classification Temperature (Tp)        | 260°C            |
| Time within 5 °C of actual Peak             | _XX              |
| Temperature (tp)                            | 20-40 seconds    |
| Ramp-Down Rate                              | 6°C/second max.  |
| Time 25 °C to Peak Temperature              | 8 minutes max.   |

#### Soldering gun procedure

Note the follows, in case of using solder gun for replacement.

- (1) The tip temperature must be less than 350°C for the period within 3 seconds by using soldering gun less than 30W.
- (2) The soldering gun tip shall not touch this product directly.

### Soldering volume

Note that excess of soldering volume will easily get crack the body of this product.
